Forecast for Wednesday 16 Feb 2022

Weather: A dry start to the day but thickening cloud will bring persistent rain by the end of the morning. Then several hours of wet weather expected until mid-afternoon, before drier and clearer weather extends from the west thereafter. Then clear periods and the chance of the odd shower for the rest of the day.

Chance of cloud-free hill tops above 700m: 50% during daylight hours, best chance later in the day

Low cloud and visibility: Some patchy low cloud down to 700 metres at first, this becoming extensive by the end of the morning and persisting until mid-afternoon. Cloud lifting off the summits mid-afternoon onwards.

**Level above which ground is expected to be frozen/snow is expected to settle.*

Meteorologist's View

Widespread upland gales and summit storms will lead to drenching conditions in rain as well difficulty making progress.

Forecast for Thursday 17 Feb 2022

Weather: Bright or sunny intervals and occasional wintry showers, these most frequent in the morning. Drier conditions developing in the afternoon.

Maximum wind: Summit winds gusting 40 to 50 mph in the morning, easing down in the afternoon

Chance of cloud-free hill tops above 700m: 70%, best chance in the afternoon

Low cloud and visibility: Outside of cloud and showers generally very good. Some patchy cloud down to 750 metres as showers pass by.

Temperature: **Valleys:** Plus 2 rising to 6 Celsius
At 700m: Minus 1 Celsius
Freezing level: 500 metres
